ABOUT

I am a backend software developer who enjoys working in a high energy environment using modern technologies. I am used to applying agile methodologies, breaking down user requirements into tasks, teaching junior developers. Some of the technologies used daily are Golang, PostgreSQl, GraphQL and RESTFul services. I am familiar with git, docker, LaTeX and NoSQL databases as well. I am not afraid of making decisions and taking responsibility. I have also experience with enterprise projects using Java and Android.

SKILLS

Golang, PostgreSQL, GraphQL, RESTFul services.
